**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: applicant's admitted prior art if the best art of record, the prior art of record teaches a liquid crystal display, comprising: a first thin film transistor formed in a picture display part together with liquid crystal cells each provided at each crossing area of a plurality of signal lines for driving each of the liquid crystal cells; a second thin film transistor included in a drive circuit that generates a drive signal to drive the signal lines and formed in a drive circuit part located at the outer area of the picture display part; and a gate insulating film formed between an active layer and each gate electrode included in each of the first and second thin film transistors. The prior art of record fails to teaches or suggest the gate insulation layer having a structure of at least two-layers, inclusive of an etch-stopper layer, and wherein the gate insulating films of the first and second thin film transistors are formed to have different thickness from each other or forming a gate insulating film between an active layer and each gate electrode included in each of the first and second thin film transistors, wherein the gate insulating film has a structure of at least two-layers, inclusive of an etch-stopper layer, and the gate insulating films of the first and second thin film transistors have different thickness from each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
